HoldCo Markets Announces the Launch of “Research Spotlight” for Small Cap Mining Equities

Toronto ON, April 10, 2024 – HoldCo Markets Advisory Inc (HCM) is pleased to announce the launch of a new equity research product – branded as “Research Spotlight” targeted specifically to the small cap mining sector.

Research Spotlight is a differentiated research product which will be specifically issuer or client paid. The purpose of this product is to showcase select smaller cap mining companies advancing unique projects, which would otherwise receive little to no coverage from the investment banks or boutiques.

“Coupled with HCM’s international investment network (both institutional and retail), we feel that we have established a solid platform for targeted research dissemination” said Michael Wichterle, HCM Director. “It has always been problematic finding quality research for small-cap mining companies. It is our belief that our Spotlight Research offering can be beneficial to both corporates and to our clients alike. Our aim is to create targeted awareness while also providing objective analysis given our long track record in mining equity research”.

“Paramount to any HCM research product or investment allocation, the due diligence process along with rigorous asset/company analysis remain the hallmarks of our work. This fact is why we maintain strong relationships with diverse clients ranging from the institutional buy-side, the sell-side and retail alike. Given our established platform, we hope to play a part in showcasing a story while also bridging the gap between corporates and investors alike”.
